SUMMARY

Founder and software engineer with about two years of hands-on experience shipping production systems in Python (FastAPI), Go and TypeScript (React, Next.js). Founder and Director of KOLAPPTECH LTD, the company behind Kola, an AI voice agent that phones customers for banks and businesses in English, Nigerian Pidgin, Yoruba, Igbo and Hausa. I own products end to end, from architecture, backend and frontend to deployment, and I pitch them on stage.

TECHNICAL SKILLS

Languages: Python, Go, TypeScript, JavaScript, SQL, HTML/CSS

Frameworks: FastAPI, React, Next.js, Vite, Tailwind CSS

Data & Infrastructure: PostgreSQL, Turso/SQLite, Docker, Git, GitHub Actions, Vercel, Render, Firebase

Voice AI & Integrations: ElevenLabs Agents, BimpeAI, Africa's Talking, Twilio, Asterisk (SIP), Paystack, REST, WebSockets, HMAC-signed webhooks

AI: LLM APIs (Gemini, Groq), prompt engineering, tool calling, AI agents

EXPERIENCE

Founder & Director, KOLAPPTECH LTD (RC 9945011) | *2026 to Present, Lagos*

- Built Kola end to end: FastAPI backend on Render, Next.js operator dashboard on Vercel, Turso, ElevenLabs agents, live call transcripts over WebSocket, and per-call briefings so concurrent calls never mix context.
- Run telephony through Africa's Talking via our own Asterisk relay, with Twilio as fallback.
- Ship two products on one voice engine: Kola for Banks (balances, virtual accounts and onboarding invites through the bank's API, with BMONI as reference integration) and Kola for Business (order confirmations, delivery updates, payment follow-ups with Paystack links, post-call ratings).
- Defined the safety rules every call follows: recording and AI disclosure, opt-out, human hand-over, and never asking for PINs, passwords or OTPs.

Founder & Lead Developer, Toolzng (toolzng.me) | *2025 to Present, Remote*

- Built and run a live platform that formats academic research and preliminary pages to institutional standards for Nigerian students (Go backend, Python document service).
- Own hosting, deployments, production fixes and analytics (Render, Umami).

Software Developer Fellow, Learn2Earn NG | *Feb 2026 to Present, Lagos*

- Build production-oriented projects in shared codebases under senior-developer review.
- Built frontend features for Verbatim (verbatim.site), an AI transcription app (React, Vite, Tailwind, Firebase).

AWARDS & PITCHES

- **1st Runner Up, Paystack AI Builder Challenge** (Oct 2026), with Kola for Business.
- **1st Place, Learn2Earn x BMONI "Hack the Future"** (Sept 2026), with Kola for Banks.
- **1st Runner Up, BimpeAI Lagos Agentic AI Hack Night** (Sept 2026), with Kollect, a voice agent that calls overdue borrowers and agrees repayment plans.
- **Invited product showcase, OpenAI x Paystack forum:** presented Kola on stage.
- **Showcase, 2026 ADF-YGL Convening:** presented Kola to Young Global Leaders at the Aliko Dangote Foundation and World Economic Forum convening in Lagos.
- **Midnight Network Eclipse content bounty:** won with a developer tutorial on the Proof Server and Indexer.

EDUCATION

National Diploma, Science Laboratory Technology, Yaba College of Technology, Lagos | *2022 to 2025* | CGPA 3.25 / 4.00

Leadership: Ambassador, Midnight Network | Vice President, NASTES Yabatech Chapter
